"The Unknown Soldier"

Tremendous Story of Love and War, Filled with Drama, Tears, Laughs and Wonderful Beauty is the Fine Picture "The Unknown Soldier."

TO SAVE THE WORLD he fought, bled and—behind the fighting line a loving girl, patiently waiting, prayed to God to protect him, then—a story of love and war, of hope, faith and sublime devotion.

COMING MAY 24th—BIG DOUBLE PROGRAMME:
Charlie Chaplin in "Shoulder Arms" and
Norma Shearer in "The Waning Sex."

COMING NEXT FRIDAY AND SATURDAY:
"THE MIDNIGHT SUN."

Chronicle Completes Eighth Year

With this issue The Chronicle finishes its eighth year of publication. Looking backward the time seems very short. It has included some of the most difficult years ever experienced here and also some of the most prosperous. From the standpoint of averages we seem to have been a little better off here than almost anywhere else in the world, considering agricultural communities. There have been difficulties in the past and will doubtless be difficulties in the future, but at the present time the situation is decidedly hopeful in every direction. While progress has been slow as the result of a long period of depression in the early twenties, there has been progress, and the future promises more rapid movement in a forward direction. Many of the serious problems of the past have been solved and the problems of the future will be met with greater courage in consequence.

Crop Prospects Never Brighter

Rain, which began to fall on Tuesday at one o'clock, and continued until well into Wednesday, thoroughly soaked the grain fields and left us with what appears to be the best prospects ever experienced here. Practically all the wheat and considerable of other grains had been sown previously to the rain and the bulk of the wheat was well above the ground. A few days of warm weather will put the crop further in advance than it has been in much earlier springs. Naturally, the roads are very muddy and auto traffic is not very pleasant at the moment, but a day or two will remedy this part of the situation.

"Shoulder Arms," Charlie Chaplin's finest and best comedy, Tuesday May 24th, at Champion Theatre.

Rev. R. J. Mossner, who has been pastor of the Evangelical Lutheran church, with headquarters at Champion, for some years, left on Wednesday for the States, where he will reside in the future.

Geo. Harper has been re-elected as principal of the Grange high school for the coming year at an increased salary. George has made a real success of his work this year.

L. Nelson and Mrs. R. F. Nelson were visitors in Lethbridge for a few days.

Mrs. Geo. Alcock and family spent the week end in Calgary.

An extraordinary picture story of love, war and peace, filled with tears, laughs, appeal and expectancy—the most remarkable picture production of the decade, See "The Unknown Soldier," at Champion Theatre.

The Canadian Red Cross, on Empire Day will enter on a nation-wide campaign to raise \$1,000,000. It is understood that the society will make its appeal directly on its record of accomplishments in its services for the disabled soldier, its training of our post-hospital, the support nurseries, Halifax, Saint John and Quebec, the Junior Red Cross now numbering in Canada 140,000 children engaged in the pursuit of health for themselves and handicapped children; the Disaster relief activities of recent years; and the home nursing training which has been extended to over 12,000 women and girls in the last three years.

Champion Theatre is giving a big double program, Tuesday May 24th, Charlie Chaplin in "Shoulder Arms," and Norma Shearer in "The Waning Sex."

Barber Shops Will Close Wednesday Afternoon

Beginning next Wednesday, May 25th, the barber shops in Champion will be closed on Wednesday afternoon, the regular weekly half-holiday. Patrons are requested to make a note of this fact and avoid disappointment.

The Ladies' Aid will meet at the home of Mrs. Fred Wise on Thursday, May 25th, at 2:30.

Mr. and Mrs. G. M. Campbell, attended the Universal Film Co. Banquet at Calgary on Monday.

The addition to E. Latiff's billiard room is nearing completion and the building will soon be ready for occupation.

Mrs. T. Gill and Mrs. Herbert Gill and little daughter, Joyce, leave on Monday for Victoria, where they will spend the summer.

The McLean residence is making rapid progress and will be ready for occupation shortly. M. McGaw is now busy with the interior decorations.

P. O. Sommers has just finished a 70 barrel cistern on his residence property and contemplates further improvements in the way of an addition.

Mr. and Mrs. J. Cook spent the week end at Gratum on a visit to their daughter, Mrs. Geo. Harper, returning by Nanton where they visited their son, H. Cook.

The addition to the old Anderson billiard parlour is nearing completion and it is nearly apparent this will be one of the finest and best equipped billiard parlours in the country. Several new tables, including two snooker tables, are included in the plans.

Mr. and Mrs. G. A. Manhard left this week to visit Blackfalds, driving their new car. No other explanation is necessary to explain the big rain storm here. Every time Mr. Manhard makes a trip to Blackfalds it rains cats and dogs.

After beginning the foundation for the new pool elevator some difficulty with regard to the site arose and operations were delayed for several days in consequence. It is understood the matter is straightened out and further delay will be avoided.

There will be quite a general movement in town in the next few days. R. Tyler moves to the house recently purchased from Herbert Gill; George Mark will move to the house now occupied by Mr. Tyler and E. Latiff goes to the Mark residence. H. Lyon, of the Ford Garage will occupy the premises vacated by E. Latiff.

Herbert Allan, a 17 year old boy of Middleport, N.Y., is credited with stumbling upon a simple process by which water may be changed into gasoline. A garage man who has tested it claims it is high test gasoline and costs only one cent per gallon. It has been tested by Buffalo chemists who agree it has immense possibilities if made as claimed.

Considerable progress has been made on the golf grounds and appearances would indicate that Champion will have a real golf links when the improvements in progress are completed. In spite of the incomplete stage the grounds are now in there is a considerable turnout of enthusiasts every evening, with an extra crowd on holidays.

A THRIFTY STORE For Thrifty Buyers

In these days of keen competition and the survival of the fittest, our business continues to grow because we cut out waste and give more for the money.

The elimination of charge accounts to strictly thrifty days is largely responsible for our greater value-giving which adds daily to a list of new customers who are starting to trade here.

The more a man insists on getting full value for his money—whether it's much or little—the more certain he is to come here and be glad he did.

THURSDAY, MAY 10, 1927

NOTES AND COMMENT.

Growth has been considerably more rapid during the past week, and the grain fields are taking on a very handsome tint of green. The high winds, so prevalent this spring, seem to have been staying with us, but even these have been less frequent and less violent of late. Summerfallowing in progress on many farms, with seeding practically completed everywhere.

An effort towards rousing enthusiasm in the direction of better control of noxious weeds is under way this year, sponsored by the department of agriculture. There is no doubt in anyone's mind that there is plenty of room for improvement in this direction and as the country is becoming more prosperous there should be less difficulty in securing the co-operation of the farmers.

The proposal to add 100 square miles to the area of Jasper Park, a considerable portion of which is nearer to Rocky Mountain Park than to Jasper, is meeting with general opposition as far as Alberta is concerned. The principal contention is that the territory involved should not be taken from Alberta at a time when the natural resources of this province are in the course of being transferred to provincial control, at least not without the consent of the province. It is pointed out that the extension of the Jasper Park to the south will adversely affect the attractions of Rocky Mountain Park, particularly in removing a section which is at present attractive for big game hunters. The area involved, too, is claimed to be rich in minerals, water power and timber, and its inclusion in territory which will be administered by the Dominion is unfair to provincial interests. There seems to be every ground to protest the inclusion in Jasper Park of the area in question until it is conclusively proved that it is largely useless except as a government park.

President insisted cases of scarlet fever are likely to continue unless quarantine regulations are taken more seriously by the public at large. These regulations are not made to penalize those who are unfortunate to contract the disease but are necessary for general protection from what might be a serious epidemic. The fact there has been no fatalities here perhaps led to less precaution being taken in some instances, and the fact that new cases develop with regularity is the best evidence possible that more or less careless observance of quarantine has occurred. Doubtless, many people have been right in their efforts

to prevent the spread of infection, but one careless individual could easily render the efforts of the health officer and other members of the community useless. There are severe penalties for breaking quarantine but there will always be a tendency to avoid being an informer in this respect. The good sense of the public should prevail in this instance and every precaution be taken, not only by promptly reporting suspicious cases, but to keep cases of scarlet fever and other contagious or infectious diseases strictly under quarantine regulations.

FOUND—On Main Street, Champion, on Saturday night, rubber tire chain, practically new. Owner inquires at Chronicle office.

Alberta Wheat Pool local elevators have handled a total of over five and a quarter million bushels of wheat from the 1926 crop. The pool has forty-two elevators in operation at the present time. One hundred additional elevators will be built or acquired during the spring and summer. The average handling of the pool elevators to date is 124,750 bushels per elevator. Some of the elevators were not opened until late in the fall of 1926. On the whole the record of the pool group of "homes" has been satisfactory. Strome pool elevator heads the list with total

Canadian War Claims
Total Fifty Million

Commission Will Probably Pay Nine Millions for Losses

More than nine million dollars will probably be paid to Canadians for losses suffered during the great war. This sum, it is stated, represents the total amount approved for payment out of claims aggregating fifty million dollars, in a claim report prepared by James Price, K.C., M.P., M.P., N.B., read in committee in investigating Canadian claims for war indemnity against Germany.

Approximately 1,987 awards have been made, while thirteen hundred claims are in the process of being considered by the commission. It is expected that this final report will be available in the near future.

A list of the number of successful claimants is being withheld until the whole question of payment of these claims is considered by a subcommittee of the cabinet. Little likelihood exists, however, that the matter of payment will be officially considered until the commission's final report is received. It is generally expected, though, that this question will be before Parliament at its next session, which body alone, it is felt, must, can finally authorize payment.

Votes for Women

Arguments That Women Are Mentally Inferior to Men Is Answered

"Sir William Laurier once told me that he wanted the vote for all men in Canada," said Prof. Carl Deckel, addressing an audience last night in Montreal.

The argument that women were mentally inferior to men, Prof. Deckel answered from her vast historical knowledge. She showed that while there had been more men than women geniuses, there was the same preponderance of both who were insane and feeble-minded over mentally sound women. She said that an abnormality, this meant that there was a greater proportion of women with the normal intellect than with the abnormality of mental weakness, the same way of running a country.

Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which has been in existence since May 21 and July 1.

Farmers in Illinois are pounding at night in an effort to get ground ready for corn planting after a delay of nearly a month caused by heavy rains. Tractors have been equipped with headlights and many farmers are running them 24 hours a day.

The immigration of potatoes into Canada from Europe, the Azores Islands, Canada, Ireland, Newfoundland, the islands of St. Pierre and Miquelon and the State of California are prohibited under an order-in-council made public in the Canadian Gazette.

Lt.-General Sir Herbert Bylandt, member of a noted Nova Scotia family of soldiers, has been appointed to the office of lieutenant of the tower of London. Sir Herbert is 61 years old, the son of Col. C. J. Unwin, and was born in London. He entered the Royal Artillery when 19 years of age.

ADDED TO THE WHITE STAR LINE FLEET

The S.S. *Calgarie*, 16,063 tons, one of the two steamers recently added to the White Star Line Canadian service.

The *Calgarie* will be a midship ship with a regular and direct service to Glasgow before completing her east-bound voyage at Liverpool.

The *Calgarie* has five decks including the boat deck. The public rooms are located on "A" deck which is glass enclosed thereby enabling passengers to enjoy daily exercise irrespective of the weather.

Another lounge and the gymnasium are on "B" deck, the accommodation on which also includes suites and a number of staterooms, all of which are equipped with beds.

Women Score Success in Business

Saskatchewan Egg and Poultry Pool Reports Big Returns

When lately women report the egg and poultry business on a co-operative basis, many men and few methods worthy of emulation. At the first annual meeting of the Saskatchewan Egg and Poultry Pool, held at Regina, the directors of which, except one, are all wives of farmers, the report for the year's business showed a turnover valued at \$22,117. The pool began business at the end of March, 1924. During the year it handled 1,238,471 dozen of eggs, and \$19,000 pounds of poultry.

At the close of the year the pool had paid up share capital amounting to \$12,724 and a reserve of \$1,000. The membership is approximately 1,000. The Saskatchewan Co-operative Creameries, Ltd., Regina, is turning over its entire egg and poultry business to the Saskatchewan Co-operative Poultry Producers, Ltd., the registered name of the Egg and Poultry Pool. All the facilities of the creameries' association for assembling and handling eggs and poultry, including the equipment for sorting, grading, packing and dressing for market, have been taken over by the Saskatchewan Egg and Poultry Pool. Arrangements have been made for the 22 local co-operatives to act as assembling and shipping agents for the Pool.

The Saskatchewan Egg and Poultry Pool was organized last year and its success has been largely due to the President, Mrs. Bertha Hanson, a farmer's wife of Assiniboia, Sask., and her co-directors.

Cheap Electricity

Electricity is one item in the cost of living in Canada which is much cheaper now than in previous years. The Dominion Bureau of Statistics index number shows a reduction in the price of electricity for residence lighting of 21.2 per cent. from 1912 to 1926. Canada leads the world in the per capita distribution of electricity from central electric power stations.

Women are encouraged by world conditions of the stomach and the skin, and an ailment, Miller's Worm Powders will help them. These conditions almost immediately will sweep the worms away. No destructive poisons are in the medicine. No 1222 is for the kids and little shavers. It is a health-giving medicine which is not only a worm destroyer, but a health-giving medicine beneficial to the young constitution.

A will, consisting of twenty-five words, excluding of signatures, etc., made by a man, was valued at more than \$1,000. It was written on the back of a bridge order read by a Minnola, N.Y., woman.

SUNDAY SCHOOL LESSON

MAY 22

PETER HEALS THE LAME MAN

Golden Text: "In mine name is there salvation for him that believeth in me."—John 14:6.

Lesson: Luke 23:1-13.

Devotional Reading: Isaiah 53:1-6.

Explanations and Comments

1. Peter Heals a Lame Man. Luke 23:1-13.—Nine in the morning and the lame man came to the temple for sacrifice and prayer. It was the hour, or three in the afternoon, when Peter and John, the two apostles so often mentioned together in the Gospel narrative, went to the temple to pray. They observed the lame man as he came to the temple for prayer. They observed the lame man as he came to the temple for prayer. They observed the lame man as he came to the temple for prayer.

There is a close connection between religion and health. The church members are the great pillars of the world. The church members are the great pillars of the world. The church members are the great pillars of the world.

Firestone

Dips the Cords of the Carcass in a Rubber Solution!

Here you see one of the cords, highly magnified, from a Firestone Gum Dipped Balloon Tire carcass. The cord is unraveled into 15 smaller cords, composed of millions of cotton fibers.

Firestone dips all the cords in a rubber solution. Every cord is saturated and insulated with rubber, adding great strength and enabling the cords to flex with minimum friction.

Go to your nearest Firestone Dealer to-day. He will provide these "Better Tires" along with helpful service, which means extra mileage, safety and comfort.

Western Canada Points the Way

One of the most notable gatherings of the year, and one in which all the people of Western Canada were particularly and directly interested was the International cooperative wheat pool conference held at Kansas City, Mo., at which representatives were present from the United States, Australia, Germany, Russia, as well as from the three great wheat producing provinces of Canada.

Western Canada was really the outstanding and dominant factor at the conference. And rightly so because in three short years the farmers of the Prairie Provinces have organized and developed the greatest grain handling organization in the world. Their success has been phenomenal, eclipsing anything of a like character ever attempted in connection with any commodity. They can speak from actual experience in definite achievement.

It is not surprising, therefore, that at the Kansas City conference the reports presented on behalf of the Alberta, Saskatchewan and Manitoba Pools, and their common central selling agency, were received with great enthusiasm, and that the views expressed and suggestions advanced by the Canadians commanded respect and gave strength to the deliberations of the conference.

Many of our own people have not yet grasped the full magnitude of the operations of the wheat pool, nor realize just how much has been accomplished in the brief period of approximately 1,000 days. Three years ago there was no Canadian Pool. Today, to quote A. J. McNeill, president of the Saskatchewan pool and of the Central Selling pool, there is a membership of 128,000 in the three provinces. In 1921-22 the Canadian pool handled 187,000,000 bushels of wheat belonging to its farmer members and 27,000,000 bushels of coarse grain. The pool has representatives in all the world's important countries and ships wheat to sixty European ports. It owns and controls approximately 650 country elevators in the three provinces with a combined storage capacity of approximately 22,000,000 bushels. At the head of the Lake the pool has its central elevators with a storage capacity around 15,000,000 bushels and also a 2,400,000 transfer line to Buffalo. The pool is also operating terminal elevators at Prince Rupert and Vancouver, while plans are under way for large extensions to the country elevator system to all the provinces. Since the pool began to operate it has paid its farmer members about half a billion dollars.

These are truly remarkable achievements, but they do not tell the whole story. The pool has effectively revolutionized the financing methods of our Western farmers. Instead of the farmer getting all his money in one bulk sum every Fall, at which time every creditor made desperate demand upon him, with the result that he was practically forced to sell his wheat at 2¢, the then prevailing price, and by all following the same course during the market, he now receives a first payment and several successive payments spread over the year. The result is 8¢ more early marketing of the wheat and under financing on the part of the farmer. He is in an enviable position, even enjoying his business on cash rather than a credit basis. The system has been of wonderful assistance to the weaker, less business like farmers.

Equally important has been the effect the pool has had in restoring confidence to the farmer and to business. Investors generally throughout the west, it has given the farmer a feeling of independence and security. It has broken it. It has emphasized the value of co-operation, and the strength that is to be found in organized cooperative effort as contrasted with each man striving to work out his own problem and his own destiny.

The farmers of Western Canada have demonstrated the wisdom of having one great selling agency instead of one or two hundred thousand farmers each selling individually and in competition with each other. The object of the Kansas City conference was to try and get these various countries to agree when producing countries of the world could cooperate instead of competing against each other. The most cordial response was accorded the idea, and efforts will be made to derive a workable plan.

Reopen Milk Plant

One of the largest manufacturers of milk products has recently reopened their manufacturing plant at Moose River, B.C. The whole milk supply will be obtained from the Fraser Valley, which will amount to about 500,000 lbs. per month. The plant and ranch will be employed in the plant, and the pay-roll will amount to about \$2,500 per month.

Orders for Farm Implements

During the past few weeks large orders for farm implements and machinery have been placed with Canadian manufacturers to represent the Russian Empire Government. These orders are thought to be the largest ever placed in Canada, and will be required to transport the goods now on order to the new front.

New Depot for Edmonton

The Canadian National Railway will build a new depot at Edmonton, Alberta, this city. The estimated cost is \$1,000,000. Tenders for the erection of the building have been received and the contract will be awarded as soon as they have been considered.

The World's Shortest Railroad

Shortest railroad in the world now belongs to the city of Yukon, Ont., having been bought for \$100,000 by a local citizen. The line is only 100 feet long and runs from the city to a point on the Yukon river, where it crosses the river by a small bridge.

Children Cry for

Fletcher's CASTORIA

MOTHERS—Fletcher's Castoria is especially prepared to relieve infants in

arms and Children all ages of Constipation, Flatulency, Wind, Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of **Dr. J. C. Fletcher** Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Huge Dairy Farm

Largest Herd of Dairy Cattle in North America to be Established Near Winnipeg

There is not a lot of one thing that is more talked of in the dairy circles on the Manitoba dairy farms at Mayfield, on the Canadian National Railway, southeast of Winnipeg, it is the intention of the company, which is colonizing a 50,000 acre tract of land with dairy farmers, to increase this herd to 2,000 head, which will make it the largest herd of dairy animals under one ownership in North America.

Joint Stiffness Goes, Swellings Disappear,

Pain Is Subdued

No Limit Given Such Universal Satisfaction

NERVILINE

It is the great penetrating power of Nerviline that makes it so effective in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief.

No ill effects, no harm to the system. No ill effects, no harm to the system. No ill effects, no harm to the system.

Use it for Rheumatism, Lumbago, Neuralgia, and Colic. 25 cents at all dealers.

For Improved Highways

Huge Sums Spent Last Year

During the year 1922, a total of \$15,562,000 was spent on construction and maintenance of all provincial highways in Canada, according to a report made by the Dominion Highway Commission.

Of this total, \$3,558,000 was spent on construction, and \$12,004,000 on maintenance of highways already constructed. The total mileage of roads improved in this aggregate expenditure was 16,821.

For Friendly Relations

Sir Elme Howard, British Ambassador to U.S., Addressed San Francisco Audience

A plea for continuation of friendly relations between the United States and England, which have extended for more than four years, was made by Sir Elme Howard, British ambassador to the U.S., at a banquet tendered him by the San Francisco Chamber of Commerce.

Referring to the question of the British war debt to the United States, Sir Elme said:

"We have not run away from the debt and do not intend to, but if we can later date you come to us and say you think it would be advisable in the general interest to reorganize the question, well, I won't say that we shall refuse."

"There is the attack that has been made in certain quarters against the British Government over the question of credits," he continued. "It was advised at the Washington conference that unless substantial aid was given, Great Britain would not be able to carry on the war."

"It is the great penetrating power of Nerviline that makes it so effective in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief."

"No ill effects, no harm to the system. No ill effects, no harm to the system. No ill effects, no harm to the system."

The Don Cleaning & Dyeing Co.
WATCH FOR THE DON CAR

Now an Even
Greater Car Scoring
an even Greater Success

YOU know how all the resources of General Motors the original Pontiac ever introduced into priced sixes. You know the wildlife success that resulted.

But do you know that the present day Pontiac—at its new low price, is a new and finer six—an even greater car that is scoring an even greater success?

It offers the added appeal of new Fisher bodies—longer, lower, roomier and finished in new and striking combinations of enduring Duco.

It embodies important mechanical refinements—tilting-beam headlights with foot control, new transmission and brake levers, all-light universal joints and a clutch even smoother in action.

It provides in full measure those basic Pontiac qualities that took all America by storm—those qualities of stamina, economy and long life which were developed by over three years' testing on the great General Motors Proving Ground!

Small wonder that the tide of public preference is turning to the Pontiac Six—as never before to another six in the low-priced field!

AT NEW LOW PRICES

PONTIAC SIX

Mrs. J. N. Beaulieu returned from the Holy Cross hospital Calgary, on Wednesday, convalescent, after a recent operation for appendicitis.

The adjourned meeting to consider reports on July 1st will be held in McCullough's hall on Wednesday evening, May 28th. A general attendance is requested on this occasion as it is evident the town is unanimously in favor of going ahead with the idea.

The number of houses to house peddlers who put in an appearance these days is amazing, both from the viewpoint of how they all manage to survive at the game and also as to what possible protection a merchant who lives here and pays taxes has from this sort of thing. Whether these people have provincial licenses or no licenses at all might well be investigated. In the former instance it would appear that provincial licenses are too easily required for the benefit of the public at large and in the latter case there might be room for collecting some revenue for the village or municipality.

Weaner pigs for sale. Apply to P. Peterson, Phone R1095, Champion.

Strayed

Strayed from my premises on or about April 1st.

One grey mare, weight about 1200, branded on left thigh.

One black gelding, white strip in forehead, same brand as above on left thigh.

One bay gelding, white face, light color body, branded PF on left shoulder. 4 years old, these horses are all broke to work and may have other brands.

A reward of \$5.00 will be paid for return to me at Champion Alberta.

CANADIAN PACIFIC

DUNLOP TIRES

THAT splendid appearance of Dunlop Balloons is no guesswork. That rugged road resistance is not there by chance. That adequate resiliency was no blind selection.

You receive the benefit of thirty-three years of honest thinking, careful planning, judicious experimentation when you buy DUNLOP TIRES to-day.

Thirty-Three Years' Merit
